

Are you struggling with infertility
and want a more ethical treatment than IVF?

Would you prefer not to use birth control
to treat your health issues?

Saint Peter's Gianna Center may be able to help you!

Located in Somerset, NJ, Saint Peter's Gianna Center provides both medical and surgical NaProTECHNOLOGY (Natural Procreative Technology). By timing blood and ultrasound tests to a woman's natural cycle and occasionally using meticulous surgical evaluations, we can give many women a diagnosis for their otherwise unexplained infertility and other health problems. Saint Peter's offers unique medical and surgical treatment approaches for these health issues.

Guided by Catholic ethics, Saint Peter's Gianna Center does not prescribe contraception or perform sterilizations, abortions, or artificial reproductive technologies such as in vitro fertilization (IVF) or intrauterine insemination (IUI).

Conditions we can help treat include:

- Infertility
- Painful menses and chronic pelvic pain
- Endometriosis
- Polycystic ovarian syndrome (PCOS)
- Recurrent miscarriage
- Premenstrual syndrome (PMS)
- Postpartum depression
- Uterine fibroids

To schedule an appointment, please call 732.565.5490.
